Customer Release Notes, November 18, 2021 (2.22.2)

Release effective November 18, 2021

This document describes the main features of the release.

Changes in this release

Cloud Based Signing of App Images: Allows developers to sign their containers for Control Center deployment without requiring HW dongle.

Coexistence: Coexistence of Wi-Fi 2.4 GHz, Bluetooth and ZigBee which looks to avoid self-interference on 2.4 GHz.

Port Management Improvements: The physical ports configuration pages on both the VHM and Node Manager applications have been updated to provide an improved user interface for common procedures.

Veea Home Assistant vBus: Home Assistant is a central control system for smart home devices with focus on local control and privacy. A vBus component for Home Assistant + Home Assistant have been added to the range of Veea subscription packages.

FCS: Fulfilment Centre Software (FCS): UPS warehouses to upgrade software prior to shipment to customer deployments.
