Customer Release Notes, April 6, 2022 (2.25.1)

Control Center release April 6

Platform Software release April 7

Changes in this release

- Control Center upgraded for easier use and enhanced functionality, including navigation improvements, logging improvements, new look and feel, and expanded help accessible from Control Center.
- VHM upgraded for easier use and enhanced functionality, including a new log in screen, new profile, new account screens, and push notification enhancements.

Known Issues

- In Control Center, the first time you visit the vTPN tab you may be spontaneously logged out. If this happens, close the tab and reopen it.
